

How Law Can End The Poverty Of Nations: The Kauffman Foundation On Innovation By Hernando De Soto

The Key To Unlocking Prosperity For All

In his groundbreaking book, *How Law Can End The Poverty Of Nations*, Hernando De Soto argues that the key to unlocking the potential of the poor is to give them legal rights to their property. By ng so, they can access credit, start businesses, and improve their lives.

De Soto's research has shown that the poor in developing countries often lack formal property rights to their homes, land, and businesses. This makes it difficult for them to access credit, start businesses, and improve their lives. Without legal rights to their property, the poor are often trapped in a cycle of poverty.
